

A Closer Fit for your One-Seam Pant©

Many of you have requested a chart to know exactly how much ease is needed for a closer fit around the hips in your One-Seam Pant© and how to make the simple alteration to your pattern.

If you would like your One-Seam Pant© to have a snuggier fit, or if you fall between two sizes, here is a quick alteration for both the straight leg and tapered leg styles.

The pattern will be adjusted along the grain line (you will find it in the center of the tissue pattern on both styles) from the top of the casing (raw edge) to the bottom of the hem (raw edge).

You need to measure your full hip circumference...wherever your hips are the largest size (this may be your tummy or your upper thigh), then place yourself in the chart below and proceed with the adjustment along the grain line. I have only added 3" of ease to each hip measurement in the smaller sizes and 3½" in the mid to larger sizes.

I have found it easier (and more accurate) to cut along the grain line, draw a pencil line parallel to the grain line, overlap the amount indicated for your size, and tape into place. It might not seem like a big adjustment, but because of a left and right leg, the amount is doubled.

Once the hip circumference alteration is finished, continue with the instructions on page 2, column 3 of the pattern instructions to arrive at the depth of crotch.

STRAIGHT LEG STYLE FOR ONE-SEAM PANT© **WITHOUT POCKETS**

YOUR HIP MEASUREMENT	CUT PATTERN SIZE	<u>REMOVE</u> THIS AMOUNT FROM GRAIN LINE ON TISSUE
